### Mamata Installs 100th Machine in America

Mamata introduced its Bag makers and Pouch makers to North American market in January 2004. Our customers were quick to realize and accept our strengths, Engineering Excellence, Value for Money, Flexibility, Prompt Customer Support and Cost Effectiveness, combined – to ensure ‘more bang for your buck’.

Today, we are proud to achieve the landmark of 100 + Machines installed in America. In April 2013, Mamata installed its 100th Machine in USA, at Diamond Flexibles, Northbrook, IL

Diamond Flexible Packaging is one of the industry leaders for producing the highest quality custom flexible t packaging products. They offer a variety of pre-made pouches and custom bags. Besides their capabilities to convert Polybags, they offer Pouch options like sliders, side gusseted, side gusseted with slider, press to close, side gusseted quad seal and more.

Diamond Flexibles ordered their fourth Mamata machine earlier this year. It is a 48” Split draw Roll Universal bag Machine to add value to their Poly bag converting division.

This Split draw Roll Bag machine is capable of making Side seal, Bottom seal, Twin seal Bags. Besides running two printed bags at same time, the most unique capability of the machine is it’s quick changeovers from side seal to Bottom seal to Twin seal Jobs. You can practically shift within 10 minutes from side to bottom to twin seal application.

To celebrate the 100th Machine installation in North America, Mamata invited Diamond Flexibles team and representatives from leading publishers in Plastics Industry on July 22, 2013.

It was our pleasure and honor to felicitate Mr. Howard Diamond, President of Diamond Flexibles with a Citation of Appreciation and a Memento towards his contribution and support to Mamata. The support of Media was also recognized by presenting them with Certificate of appreciation and a memento to commemorate this celebration.

Hard work of team members of Mamata was also recognized by presenting them with certificate of Appreciation for the dedication and efforts put in to achieve this landmark.

Mamata also announced the move and deputation of Mr. Sanjay Amin from India office to US office full time.

Mr. Amin will now be based at our Montgomery, IL location and will be in charge for Pre-sales and after-sales support activities of Mamata bag / Pouch Machines for North, Central & South America. “Move of Mr. Amin will certainly help Mamata to grow it’s reach of Bag / Pouch Machines in

North, Central & South America at a faster pace now” said Mr. Patel, President Mamata Enterprises, Inc. USA.

Mamata thanks Diamond Flexibles, all the representatives from media present at the event of 22nd July 2013. We also wish to thank all our customers in North America for their continued trust in us and make us and look forward to their continued support.

Today, In USA, Mamata operates from two locations and caters to the needs of both converting and packaging industry. Our Montgomery, IL facility is pre-sales and after-sales service center for Bag / Pouch Machines.

Our Bradenton, FL Facility designs and manufactures state-of-the-art horizontal form, fill and seal pouching machines, pick fill and seal machines as well as multilane sachet packaging machines.

Both facilities are also showrooms of Mamata Machines for North, Central and South America and feature equipment in house for testing and demonstration.

### We Shape Plastics, PMMAI Formed to Promote the Interests of the Indian Plastics Machinery Manufacturers

PMMAI's mission is to promote the interests of the Indian plastics machinery manufacturers for technology up gradation utilising Govt incentives, technology knowledge sharing, Skill set development, global benchmarking, market development, export marketing, industry growth, representing to Government for policy issues affecting plastics machinery manufacturers etc.

PMMAI will be the catalyst for the whole plastics industry, including PMMAI members, for close co-operation to improve the image of plastics, have better public relations vis-à-vis Govt, NGOs and public at large, have interactions for industry growth, promote domestic and export

market development for entire spectrum of plastic industry products, including plastics machinery, support planned plastic recycling program with equipment development and grass root level education.

PMMAI's vision is to generate high degree of co-operation amongst members of PMMAI for benefit of all members. This will come thru, market intelligence, technology sharing, cluster development, export marketing with India brand etc.

Their Goal is In the short term, strengthen PMMAI membership, have regular representation and interaction with Govt, seek inclusion in Plastindia, develop amicable understanding with other national and regional plastics associations throughout India.

In the long term, PMMAI will organise knowledge sharing seminars, workshops and study tours etc. PMMAI will promote an independent identity at national and international exhibitions. PMMAI will organise industry show case exhibitions

#### Why PMMAI?

Potential of Plastics machinery manufacturing has remained unrecognized by us, as well as the Government. We remained collectively visible through participations in Exhibitions and individually in our domestic & international markets, our customer community and not beyond. Our Government was pursuing the employment generation in manufacturing for our growing young population and has been encouraging the capital goods industry through various programs. But we remained unnoticed as we did not have our association to interact with Government.

**“Has been formed to help Indian plastic machinery industry to become global competitiveness and achieve world class quality in everything what we do says Mr. Mahendra Patel. He further added members of PMMA contribute the production of all items and compete, “truly we shape plastics.” Mr. Mahendra N. Patel – Chairman, Mamata Machinery Group**

**“We shape plastics” we design your product when we make the machines, we think of innovation, technology. Mr. S. V. Kabra - Vice Chairman, Kabra Extrusientechnik Limited**
